ABOUT COMPANY

BLUECORE ASSET

At Bluecore Asset Management, we are dedicated to redefining the standards of wealth creation through cutting-edge innovation and a relentless pursuit of excellence. Based in Nigeria, we operate as a licensed Fund and Portfolio Manager, driven by a mission to deliver technology-enabled, client-centric investment solutions. Our firm is built upon a foundation of integrity and global best practices, ensuring that we provide superior wealth management services that are both responsive to local market realities and aligned with the long-term aspirations of our clients.

Our core philosophy centers on a personalized approach to asset management. We recognize that every investor—whether an individual, a corporate entity, or an institutional client—possesses unique financial goals and risk appetites. By leveraging deep industry insights and proactive market engagement, we craft customized strategies tailored to optimize capital growth and preserve wealth. Our commitment is to act as a steadfast partner in your financial journey, utilizing data-driven decision-making and rigorous research to navigate today's increasingly complex financial landscape.

As a strategic member of a broader financial ecosystem, Bluecore Asset Management benefits from an integrated network of expertise, including partnerships that provide seamless access to a wide spectrum of capital market opportunities. Our leadership team brings together decades of experience across banking, financial services, and investment management, ensuring resilient performance even in shifting market conditions. At Bluecore, we don't just manage assets; we build enduring value and provide the tools necessary for our clients to achieve sustainable financial success.

BUSINESS STRATEGY

The blockchain technology by means of which there is a consecutive data recording in a chain of blocks is carried out the distributed storage of this information. The blockchain and bitcoin sometimes on the Internet are called synonyms though actually it is not so. Blockchain is technology, and bitcoin is a product of this technology.

That's why we propose to invest in base of this project. Even if product is not successful the technology may be reoriented to more modern and interesting project. Today we invest in the companies which work in the sphere of the distributed register and a blockchain. Also, we cooperate with the corporations working on development of the industry.

WHAT WE OFFER :

- Asset-backed real estate investments
- Managed forex trading packages
- High-yield investment plans
- Secure capital management
- Transparent reporting and withdrawal system

Continuous Market Insights & Support

CERTIFICATION

FINANCIAL STOCKS

A higher market capitalization usually indicates a company that is more well-established and financially sound. Publicly traded companies are required by exchange regulatory bodies to regularly provide earnings reports. These reports, issued quarterly and annually, are carefully watched by our market analysts as a good indicator of how well a company's business is doing. Among the key factors analyzed from earnings reports are the company's earnings per share (EPS), which reflects the company's profits as divided among all of its outstanding shares of stock.

Our Stock market analysts and investors may look at a variety of factors to indicate a stock's probable future direction, up or down in price. Here's a rundown on some of the variables in our stock analysis. A stock's market capitalization, or market cap, is the total value of all the outstanding shares of the stock.

Many high-growth stocks, especially those involved in emerging technologies, don't pay dividends. Some may not even have positive earnings but rather plow resources into continued growth. Well-established companies, many of which have a long history of dividends and dividend growth, may be priced for value. What's your time horizon and risk tolerance? Shares of high-growth companies often experience higher volatility and may be more susceptible to short-term market dynamics. Having a longer investment horizon might help you weather any periodic downturns and give your investment time to realize potential growth. Also, remember that investing doesn't have to be an either-or, vanilla-or-chocolate, chunky-or-creamy, heads-or-tails decision. Choosing a mix of growth stocks and value stocks can help you build a diversified portfolio. The risk of loss in trading stocks, can be substantial. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Asset allocation and diversification do not eliminate the risk of experiencing investment losses.

EXPLORE MARKET

REAL ESTATE

As one of the world's largest investors in real estate, we own and operate iconic properties in the world's most dynamic markets. Our global portfolio includes office, retail, multifamily, logistics, hospitality, triple net lease, manufactured housing and student housing assets on five continents.

Our goal is to generate stable and growing distributions for our investors while protecting them against downside risk. Our assets are diversified by sector and geography, reducing exposure to movement in any single market and minimizing volatility.

In our public and private investment vehicles, we seek to generate superior returns by leveraging our operating expertise and focusing on our core real estate capabilities—leasing, financing, development, design and construction, and property and facilities management.

We own, develop and manage office properties in key gateway cities in the U.S., Canada, the U.K., Germany, Australia, Brazil, India and South Korea.

EXPLORE MARKET

RENEWABLE ENERGY

We are one of the world's largest investors in renewable power, with approximately 21,000 megawatts of generating capacity. Our assets, located in North and South America, Europe, India and China, comprise a diverse technology base of hydro, wind, utility-scale solar, distributed generation, storage and other renewable technologies.

We utilize our fully integrated global operating platform and in-house expertise to maintain facilities, organically add value and efficiently integrate new assets, realizing cost synergies in the process.

Our business is underpinned by stable cash flows, with the majority of our power contracted under long-term, inflation-linked contracts.

The acquisition of the Terahive companies strengthened Bluecore Asset's position as a global leader in renewable power, adding significant wind and solar assets as well as operating platforms in India and China.

CRYPTOCURRENCY

The return that one achieves from investing in cryptocurrency will indirectly depend on its adoption, which will be linked to potential use cases and public trust. We view cryptocurrencies today as a speculative investment in the adoption of cryptocurrency rather than a functioning currency. Before investing in cryptocurrencies, we think investors should consider the potential use cases of the coin or platform in which they are investing. The potential applications of cryptocurrencies have progressed beyond storage of value or a medium of exchange. Below are several use cases that investors might use to support investment in cryptocurrency: Broad adoption of cryptocurrency globally A hedge against debasement of fiat currencies Storage of value Facilitation of faster payments domestically and internationally Broad adoption of decentralized finance applications such as peer-to-peer lending, tokenization of assets and other applications Other use cases that are currently unknown. Consider that someone in the 1980s with a strong command of the Commodore 64 might not have considered that one day she'd be ordering an Uber from a smartphone.

At Bluecore Asset now offers all traders the opportunity to trade a wide range of the top ranked digital coins 24/7*. Today cryptocurrencies have become known to most people as a conventional and popular investment option. The main purpose of this new technology is to allow people to buy, trade, and invest without the need for banks or any other financial institution. Cryptocurrencies are highly volatile and can be profitable to any trader's portfolio. Cryptocurrencies are not physical coins they are electronic, a digital asset that remains as data management capabilities across Bluecore Asset and Oaktree, we seek to match long-duration liabilities with portfolios of high-quality investments to generate attractive, risk-adjusted returns for us and our partners..

EXPLORE MARKET

GOLD

Historically, gold has been subconsciously viewed as a key to financial stability. The US dollar is just a piece of paper that people trust. It can be printed in whatever quantities and increase the national debt. Greece and Cyprus have already shown how "reliable" state bonds can be. Hypothetically, if a global crisis occurs and the major currencies hyper-inflate, they will devalue compared to gold because it's gold that remains the world's safe-haven asset.

At Bluecore Asset, we provide capital efficient investment vehicles to our longstanding institutional insurance investors and we deploy our own capital into the insurance sector through direct equity investments, reinsurance arrangements and hybrid solutions.

Investment is essential to build wealth and secure the future. Today there are numerous investment options like stocks, mutual funds, bonds, exchange traded funds (ETF), and many more to choose from. Since each type of investment involves some risk-reward ratio, one must evaluate the risk profile and then choose the right investment option. One way to reduce the risk quotient is to plan investments across various financial instruments and categories. Balancing a diversified portfolio may be hard, but a safe haven investment to mitigate the risk.

EXPLORE MARKET

Gold is a highly liquid asset that has the potential to reduce the investor credit risk. In Switzerland gold is predominantly used to make jewellery, given its inherent cultural significance. Also, as an investment gold can help in portfolio diversification due to its low correlation, low volatility, and utility value. Gold stands out among the array of investment possibilities as a dazzling addition that offers stability and appeal. Not only is it an investment, but it's also a strategic move in the grand scheme of financial planning, a nod to tradition, and a hedge against uncertainty. As seasoned experts suggest, a judicious approach recommends limiting gold investments to approximately 10-15% of one's portfolio. This percentage may fluctuate based on economic tides or governmental debt dynamics. Yet, amidst the numerical deliberations, the guiding principle remains—align your investment strategy with your overarching financial goals.

With a deep understanding of precious metals unmatched in any competing partnership, APMEX and Sprott came together with a shared vision for the evolution of precious metals ownership. Bluecore Asset is the result of the knowledge, experience, and resources of these two globally recognized partners. Create a Free Account at [Bluecore Asset.com](https://bluecoreasset.com) Choose between our selection of investment-grade precious metals. Low premiums & tight spreads. Purchase using Bitcoin, Check, Credit Card or connect your Bank Account. No need to wait on funds clearing, you can “Buy Now, Pay Later”. Fully allocated and segregated investment grade precious metals. Annual storage fees are Silver .30% & Gold .12%.

Our Insurance Solutions team is led by a group of experienced investment and insurance professionals. Leveraging our investment management capabilities across Bluecore Asset and Oaktree, we seek to match long-duration liabilities with portfolios of high-quality investments to generate attractive, risk-adjusted returns for us and our partners.
